PROFESSIONAL SUMMARY

Software Developer with hands-on experience building functional, user-centric web applications. Proven ability to take projects from concept to execution, as demonstrated by developing complete management systems and community platforms. Passionate about writing clean, maintainable code.

PROJECTS

Real Estate Management System

April, 2026 - April, 2026

- Designed and implemented core property CRUD operations, advanced search filters, and user role management.
- Built a responsive and intuitive user interface to ensure a seamless experience for users and administrators.
- Optimized backend logic and database queries to ensure fast loading times and secure data handling.

Lebaladna Platform

May, 2026 - May, 2026

- Developed interactive frontend components to maximize localized user engagement and accessibility.
- Structured efficient database architectures to securely store and retrieve user-generated content and profiles.
- Ensured cross-browser compatibility and mobile responsiveness for a diverse user base.
